Rostyslav Kanibolotskyi

Full Stack Developer

About

I am a Web Developer born in Ukraine and based in Berlin Germany, with extensive knowledge of backend and frontend development and excellent communication skills.

Along with these skills, I've worked in the IT industry in the tourism sector, which supplied me with stakeholder management expertise as well as Customer Relationship Management.

I am looking to bring these skills to a new role of a Full Stack Developer.

Work Experience

2014 | present

Booking.com, CS office, Berlin: Senior CS Executive

- Providing on-going staff management in terms of motivation
- Coaching and mentoring, in order to ensure team performance improvement
- Performing higher level negotiations to achieve win-win resolution
- Liaising between different departments within the company

Projects

2020 | 2022

Sponty

- A unique experience of working in the team of 4 to create a product in just 2 weeks.
- Prototyping with Figma and pitching the idea in front of an audience
- Creating the DB schema, models and table associations in Rails.
- Ensuring the chat function works dynamically by using WebSocket & Action Cable and Stimulus to keep the JavaScript code elegant.
- On the front end side, creating CSS components using SASS and integrating them into the app
- Implementing a map using the Rails gem Geocoder
